F.A.Q:

Q: *What is the process of getting started with a website?*

A: *We start with either a personal or phone consultation. We will then email you a quote for your site, which will be valid for 30 days.*

Q: *What is the process of building the website to completion?*

A: *Once an agreement is reached and a 25% deposit is received your site design will be started. Within 10-14 business days you will receive 3 conceptual themes via jpeg format to choose from to build off of. Once you've chosen a theme we work with you on revisions and changes and will complete your site in 4-6 weeks (design time can however vary depending on the complexity of the site) and then remainder of payment is due.*

Q: *What if I already own a website and just want you to take over updating and maintenance?*

A: *No problem! We'll just need some info from you and any other resources you may have. Update time is usually 1-3 business days (update time can however vary depending on the complexity of the update).*
